Prices subject to change
without notice.

Note 3: KRS recommends that the customer buy loaded cartridges. However, if the customer desires detailed information relative to cartridge loading, send for KRS Technical Bulletin #100 "Information On Cartridge Loading".

Note 4: Orders for non-standard playing times will be priced at the next higher price, with a minimum order of 12 cartridges.

Note 5: All cartridges are guaranteed to contain at least the time specified.

Note 6: KRS recommends the use of a professional quality, single lubricated Mylar base tape in empty STACTape cartridges, such as RCA Type 10MCG-36NPH-B or RCA 75 TMCNPH-B preferred, or Reeves Soundcraft Unilub Type 441 or its equivalent.

Note 7: Shipping weight of RCL-100-S empty cartridge is 11 ozs.
Shipping weight of RCL-100-1860 is 15 ozs.

Note 8: Reversing the Tape - The exclusive reversing feature of the RCL cartridge is intended as an aid to editing while recording, or as a "backspace" during playback. The amount of tape which may be safely reversed is limited as follows:

- a) Packs above 200 feet may be reversed up to 10% of their total length.
- b) Packs below 200 feet may be reversed 20 feet.
- c) Packs below 40 feet may be reversed for half their length.

CAUTION: Tape should be shuttled over the same section not more than three times before the entire re-wound portion is run off. Allow two seconds between Fast Forward and Reverse operations. (This latter instruction avoids tape stretching and consequent distortion. It also prevents possible jam up on the forward and reverse stuffing chamber.)

Note 9: All prices are subject to change without notice, and this list supersedes all previous lists.
